

The Worshipful Company of Actuaries

The Actuaries Company invite the FSG: Understanding the crisis and lessons for financial services

Expert Speaker Panel: Douglas Anderson, Dan Ryan and Nicola Oliver

19th May 2020 10:00-11:00

The Worshipful Company of Actuaries are delighted to extend an invitation to a virtual event on a current business topic. Our expert panel of an actuary, a scientist and a nurse will examine the facts behind the current crisis and think about the lessons for the future, for example:

- Where has austerity hit our capacity to withstand this crisis? What investments need to be made in our health and care infrastructure to prepare us for the future?
- What data do those making decisions need? What scenarios should we consider to make better sense of the risks of a future pandemic? How does sharing data impact privacy, transparency and trust?
- How can industry and the city better support our response to pandemics?
- How will COVID-19 impact mortality in the future? What is the longer term impact on health for survivors, of delays in diagnosis and treatment of life-threatening illnesses, and of disruption to behaviour and life-style?

The format will be an expert panel presentation, followed by a moderated question and answer session which will take no longer than an hour. Our expert panel are all closely involved with mortality specialists Club Vita. You can find out more about Club Vita on their website here: <https://www.clubvita.co.uk>

[Click here to register through this link.](#) After registering, you will receive a confirmation email containing information about joining the meeting. We will be using Zoom software so you may find it helpful to set up a free Zoom account and download the app before the day, if you haven't already done so (at zoom.us).

Our panel

Douglas Anderson FIA CERA FSA

Douglas is an entrepreneurial actuary, who provided the original inspiration for what we now know as Club Vita. His actuarial career spans thirty years: before focusing on longevity risk, Douglas advised trustees and corporate sponsors of final salary pension funds on funding and risk management issues. Having developed the business model in the UK and tested it in Canada, he is currently establishing a new Club Vita in the United States.

Dan Ryan

COIOS Research, Founder and Chief Science Officer: Dan is an epidemiologist and digital demographer with 25 years experience in the insurance industry. He led global multi-disciplinary research teams at Swiss Re and Willis Towers Watson in diverse areas including forward-looking risk models, behavioural science and the rapid development of digital ecosystems that will transform how insurance is distributed and how risk is assessed, managed and mitigated.

Nicola Oliver

Nicola's background includes a long career in the UK National Health Service, firstly in intensive care, and latterly in Public Health. She founded Medical Intelligence (London) Ltd to provide insights into the main drivers behind changes in life expectancy and disease risk for the insurance industry. Nicola is an affiliate member of the Institute and Faculty of Actuaries and a member of the COVID-19 Actuarial Response Group.
